

## Eezibleed Special Edition Kit

This special edition kit contains the standard Eezibleed system as well as a multi-purpose cap, a brake bleed spanner and a classic pen-type tyre pressure gauge. Designed for fast and easy fluid replacement using air pressure from the spare wheel to effortlessly bleed both brake and clutch hydraulic systems. The versatile kit also includes four caps (25, 27, 44-45, 46mm) and three hoses making it easy to connect Eezibleed to a wide variety of vehicles. Safe to use, the one-way flow mechanism and airtight seal on the reservoir ensures fast fluid replacement with no contamination. A very useful kit that contains everything needed for single handed brake bleeding supplied in a sturdy carry case with fitted foam insert tray for convenient kit storage.

### Additional Information

- Suitable for single handed operation. Uses the air pressure from a spare tyre to effortlessly bleed hydraulic systems.
- Can be used successfully on the following systems: Tandem master cylinders without sensors, tandem reservoirs, slave servos and vacuum servos.
- Includes a range of cap and seal sizes: 25mm (Lockheed systems), 27mm (certain VAG systems), 44/45mm (metal Girling reservoirs and all ATE systems), 46mm (certain Girling systems) and the Eezibleed multi purpose cap.
- Kit includes: Pressure bottle (for new brake fluid), bottle cap assembly, bleed tube set, 5 x cap and seal sets, brass reservoir cap fitting, 2 x fibre washers and a lock nut and hook.
- Special edition kit also includes 10mm x 11mm brake bleeding spanner and a tyre pressure gauge for checking there is enough pressure in the spare tyre, all packed in a handy storage case.
