

Low Voltage Circuit Tester 6v- 48v

With the advent of new Mild-Hybrid vehicle systems which operate in the 48 volt range, Gunson has introduced a simple Voltage tester that is safe to use on such systems. The 77143 is a simple to use voltage tester that uses red LED's to indicate the voltage level and polarity of the current in the circuit being measured.

Additional Information

- No Batteries required – powered from the power source being measured
- Can be used on systems up to and including 48 volts.
- Probe – partially shrouded to reduce the potential for accidental shorting out.
- Not polarity sensitive
- Cable Length 90mm
