

Spark Plug Tester

A mains powered spark plug tester, designed to simulate engine RPM to check the condition of spark plug and performance. It features two testing ports, to allow for a quick and easy comparison of two spark plugs at once, adjustable output of 1000 to 5000 RPM (simulated), together with a clear protective guard.

Additional Information

- Designed to allow the user to test & compare spark plug performance.
- Can replicate engine RPM of 1000 - 5000.
- Hinged cover to protect user from electric shock.
- Power input: AC 100-230V. Output: 12V/1A DC.
- Supplied with AC power adaptor with UK 3 pin plug & EU mains adaptor. CE & RoHS compliant.
