

Portable Bearing Grease Packer

Used to ensure the bearing is fully and evenly packed with grease. Ideal for greasing open style axle and hub bearings, non-sealed tapered roller bearing and open ball bearing races.

Additional Information

- A wind down style grease applicator, greases the bearing without the need for excessive hand pressure.
- Features a tapered bearing guide that automatically centres the bearing.
- Designed for bearings up to 88mm O/D.
- Manufactured from strong & durable clear Polycarbonate (PC) plastic, so the bearing can be seen as it fills.
- Supplied with one pair of nitrile rubber (NBR) gloves to allow clean first time loading with grease.
